

## Building Success in Relationships

Center for Family Guidance, PC, provides child/adolescent partial hospital programs (PHP) that combine a structured treatment setting. At the core of these programs are intensive individual, group, and family therapies augmented by art and play therapies. The ultimate goals for each patient are increased responsibility and healthy adoption within the family, work, school, and community. Our child/adolescent day hospital programs operate Monday through Friday.

Patients continue to live at home but come to the hospital for care. Programs offer a holistic approach to interventions and care with the goal of stabilization.

### Additional Services at the PHP include:

- Psychiatric oversight and supervision
- Skilled behavioral interventions
- Multi-disciplinary treatment team
- Care coordination
